ODNI's Office of Civil Liberties, Privacy and Transparency (CLPT) created this "transparency tracker" document to track, categorize, and chart the information being released to the public on IC on the Record for the purpose of assisting the public in identifying and retrieving relevant information, facilitating research, and gauging the effectiveness of the IC's transparency efforts since August 2013.

Because IC on the Record is an important public outreach tool for the IC, analyzing the amount and types of information publicly released on IC on the Record provides a helpful and comprehensive way to assess the IC's progress in enhancing transparency. Specifically, this transparency tracker consists of a series of statistical summary charts followed by a detailed index of documents.
